

Network Marketing

A Powerful Money-Maker

According to Professor Stanley, of Georgia State University, there are more than 832,000 millionaires in America today. Eighty percent of them are self-made. Almost all of them, he says, are involved in one way or another in **Network Marketing**, and many of them are earning significant six figure incomes from **Network Marketing**. While U.S. household population is growing at a rate of 2 percent each year according to Professor Stanley's research, the millionaire household population is bolting along at an astounding 20 percent rate. Today, he says, one in every 75 households has reached millionaire status. At that rate, there will be an estimated 18,000 new millionaires in the next 90 days! If at least 20 percent of them come from **Network Marketing**, that means we're right in the middle of the most explosive era ever in **Network Marketing** history!

Yes, **Network Marketing** is one of the most promising income opportunities in America today. It's an opportunity that has been tested and proven for more than 30 years, and today it represents a multi-billion dollar industry which is successfully providing income for thousands of Americans from all walks of life. Almost anyone who has a true desire to be successful can become so in **Network Marketing**. Some of the biggest money earners have been relatively unsophisticated, non-business people. In fact, some of the most successful distributors in the industry never even finished high school. Most of today's successful distributors had little or no money to invest when they began marketing.

Many people have gone on to become totally financially dependent in five years or less and some of them have actually been able to completely retire in as few as one to three years with incomes of \$50,000 per year. Even though this industry is more than 30 years old and already distributes several billion dollars worth of goods and services every year, because of the growth explosion that is now underway and the fact that the vast majority of people don't even know what the term "networking" means, I'm convinced that the time to get started in a **network marketing** career has never been better than it is right now! As an independent marketer, you have an unparalleled opportunity to build a marketing organization by simply sharing the opportunity with a few committed people like you who are willing to go out and duplicate a network by sharing the same opportunity with another matrix generation level of equally committed people. That's all there is to it!

As this process continues through three, four, five, six or as many as ten generation levels in some companies, you'll be earning commissions and bonuses from the efforts of everyone in your entire organization. You may well build an organizational downline of several thousand dedicated people. This is why some people in the **Network Marketing** industry today are earning as much as \$10,000 to \$100,000 per month! Yes, I said per month, and even more! In some programs, distributors have been able to earn substantial monthly incomes within months of joining a **Network Marketing** company. I personally do not know of any other income-producing opportunity which offers that kind of potential! Do you?

Now think a moment. A doctor studies for eight years to gain knowledge of his or her profession, and then serves as an intern prior to practicing medicine on his or her own. It's the same with a lawyer, an engineer, a computer scientist, a college professor, or most other professions that you can name. Even a brick layer or carpenter must serve an apprenticeship before he or she begins earning a full wage. Yet, not one of these professions offers the possibility of retirement in three to five years, or of financial independence in a relatively short period of time. Is it any wonder then why so many doctors, lawyers, computer programmers, teachers, homemakers, and people from all walks of life have opted to select **Network Marketing** as a second career?

Network Marketing is the only business I know of that lets you multiply your efforts so that your income does not depend entirely on what you do, but rather is enhanced greatly by the efforts of every member on your marketing team.

Each of us has so many hours in a day. No one can create more hours than any other marketer. Therefore, the only alternatives which most people recognize for increasing their incomes are: (1) work more hours -- including a second job; or (2) switch jobs to earn more money per hour.

We in the **Network Marketing** industry have the wonderful option of the ultimate in time leveraging through the principle of duplication of effort. **Network Marketing** is a proven system that utilizes the power and resources of many people by exchanging concepts and directing the talents and abilities of these different individuals toward a single worthwhile goal. What other business do you know of that is legal, ethical and:

1. Allows you to start part-time from your home without the risk of losing your present income.
2. Allows you to start with a very small, affordable investment.
3. Has unlimited income potential.
4. Has no territorial limitations, no age or sex limitations, and no seasonal limitations.
5. Requires no special skills or training.
6. Is operated with very low overhead and no employees.

I think you will agree with me that there is no business on earth like direct mail **Network Marketing**. So why not get involved in **Network Marketing** today, right now, with the person who provided this material to you. Just send in your application.
